**SYMPTOMS OF EXPOSURE:** Symptoms of exposure through inhalation, ingestion, or direct contact with skin may include nausea, vomiting, diarrhea, irritation of nose, throat, airways, or skin, central nervous system depression – possibly including headache, loss of coordination, drowsiness, fatigue, and unconsciousness – and death in extreme cases. Pre-existing eye, skin, or respiratory disorders may be aggravated by exposure to this product.

**PRIMARY ROUTES OF ENTRY:** Skin contact, skin absorption, eye contact, and inhalation

**CANCER INFORMATION:** Neither this product nor any of its components is listed as a carcinogen or partial carcinogen by the following agencies: the National Toxicology Program, the International Agency for research on Cancer, and the Occupational Safety and Health Administration.

---

### SECTION 4: FIRST AID MEASURES

---

|            |   |
|------------|---|
| EYES       | Flush immediately with cold water for 15 minutes and seek medical attention.  |
| SKIN       | Remove contaminated clothing and wash affected area with soap and hot water. If irritation from contact persists, seek medical attention. Launder contaminated clothing – including shoes – prior to reuse. |
| INHALATION | If light-headed or having difficulty breathing, expose individual to fresh air and/or oxygen. If breathing stops, begin artificial respiration and seek immediate medical attention.                        |
| INGESTION  | Seek immediate medical attention. DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, keep victim's head below hips to prevent aspiration into lungs. If possible, do not leave victim unattended.    |

---

### SECTION 5: FIRE FIGHTING MEASURES

---

FLASH POINT / METHOD: >142 °F (>61 °C) / Tagliabue Closed Cup method (TCC)

AUTO IGNITION TEMPERATURE: 451 °F (233 °C)

FLAMMABLE LIMITS IN AIR (% BY VOLUME): LEL Lower 0.7% / UEL Upper 4.8%

**FIRE AND EXPLOSION HAZARDS:** Moderate flash point. Keep work areas free of hot metal surfaces and other sources of ignition.

**EXTINGUISHING MEDIA:** Use dry chemicals, CO<sub>2</sub>, water fog, water spray, or foam.

**FIRE FIGHTING INSTRUCTIONS:** Wear a NIOSH-approved self contained breathing apparatus in positive pressure mode and full bunker gear. Water may be unsuitable as an extinguishing media but helpful in keeping adjacent containers cool in order to prevent container rupture. Avoid spreading burning liquid with water used for cooling purposes.

---

### SECTION 6: ACCIDENTAL RELEASE MEASURES

---

**IN CASE OF SPILL:** Keep sources of ignition and hot metal surfaces isolated from spill. Persons involved in clean-up should wear personal protection equipment. Stop spill at source and prevent from spreading. If

spilled as a solid, scrape and then sweep up spilled material. If spilled as a free-flowing liquid, confine spill and allow liquid to solidify prior to clean-up. If run-off occurs, notify proper authorities as required. Place in chemical waste container and dispose of in accordance with local, state, and federal regulations.

**CAUTION! FLOORS COVERED WITH RESIDUAL MATERIAL BECOME EXTREMELY SLIPPERY.**

### SECTION 7: HANDLING AND STORAGE

Store in a cool, dry location at 90 °F (32 °C) or below and away from open flames, heat, and sparks. Keep work areas free of hot metal surfaces and other sources of ignition. Keep container tightly closed when not in use to prevent drying out of material.

Repack only into high-density polyethylene (HDPE). Containers used for repackaging should be thoroughly tested for long-term product compatibility before use. All new containers must exhibit product labels required for proper identification, safety, handling, and storage. Empty containers may contain product residue such as vapors – continue to observe proper handling and storage precautions.

### SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

**EYE PROTECTION:** Safety glasses, goggles, or face shield are advised. Eye washes are recommended for work areas.

**SKIN PROTECTION:** Wear impervious gloves, clothing, and shoes to prevent skin contact. Safety showers are recommended for work areas. Remove contaminated clothing and wash in hot water and soap prior to reuse.

**RESPIRATORY PROTECTION:** Exposure levels should be kept below the PEL or TLV for this product. If exposure exceeds recommended levels, use of NIOSH-approved cartridge respirator or gas mask is advised. Engineering controls should be implemented if necessary to reduce exposure.

**ENGINEERING CONTROLS:** Provide sufficient general and/or local exhaust (explosion-proof ventilation) to keep exposure below PEL or TLV.
